## Zeolite Systems

---

**AXEON Zeolite Systems** use advanced media filtration technology in order to use advanced ion exchange to meet the most demanding water conditions. These systems are designed for maximum performance with a minimal amount of maintenance and comply with all industry standards and specifications.

**AXEON Zeolite Systems** offer a new dimension in water treatment equipment and have been engineered with both the installer and consumer in mind. Systems are available in many different models and may be customized to fit your application. AXEON Zeolite Systems can be used in a variety of applications including residential, commercial, industrial and specialty.

**AXEON Zeolite Systems** are effective in reducing sediments and providing higher service flow rates and longer filter runs than equivalent media filters. **AXEON Zeolite Systems** require periodic backwashing to dispose of accumulating sediments. This is accomplished by backwashing with clean water and then disposing the effluent. During this process, the different sizes within the system separate into layers, once again preparing the filtration bed for service.

### Standard Features

---

- Fleck® Control Valve
- Easy to Program SXT Electronics
- Pre-Treat Lockout Contacts
- 48 Hour Power Backup
- Day-of-the-Week Controls
- Regeneration Can Be Triggered Immediately
- Zeolite Media NSF 61 Certified

### Options and Upgrades

---

- Yokes and Bypass Valves
- Various Sizes and Types of Connectors
- Stainless Steel Jackets

Engineered Water Treatment Solutions
