

P.A.E. Metal Bladder Tanks

P.A.E. Metal Bladder Tanks are manufactured to the highest quality standards and range in storage capacity from 2 to 28 gallons. Tanks come with a stainless steel system connection. Designed for residential and light commercial RO applications, these tanks are made from FDA listed, food grade materials.

These P.A.E. tanks feature a reliable diaphragm design, and are post-cured before assembly to eliminate the possibility of odors from the tank. These Metal Bladder Tanks are NSF-58 certified and also feature a side mounted air valve. Tanks come standard in white; however they are also available in blue.

Features

- Delrin Material For Increased Strength
- Made from FDA Listed, Food Grade Materials
- Reliable Diaphragm Design, Post Cured Before
- Discharges Efficiently in a Vertical or Horizontal Position
- Assembly Eliminates the Possibility of Odors from the Tank
- Maximum Working Pressure is 100 psi
- NSF 58 Certification
- Stainless Steel Threaded Stem
- Designed for RO Applications
- Side Mounted Air Valve
- Tank Stand Included
